Travel Cue: Redefining Corporate Travel Solutions!

Travel Cue is a travel information management company which organizes travel-related content, services and information for the benefit of its clientele.

Travel Cue was established to serve the need of clients in a wide range of industries, which includes the Oil & Gas, Shipping & Marine, Education, Legal, Banking & Finance, and Information Technology sectors.

To fulfill its role as a one-stop destination for travel information solutions, the company required a robust IT infrastructure capable of managing and categorizing the large amounts of data the company has to process on a daily basis.

The Problem

1. Travel Cue needed a flexible and robust IT infrastructure capable of handling high loads, in order so the company can deliver its services to its clientele effectively.
2. To ensure that Travel Cue could commence business operations as soon as possible, the IT infrastructure had to be implemented within a tight deadline.

The Proposal

Why Lantone Systems Was Chosen

The founders of Travel Cue were employees of a company in the same industry, which had also engaged the services of Lantone Systems. This meant that Lantone’s engineers would be familiar with the set-up and requirements that Travel Cue would need for its business operations as well.

Lantone’s Solution

A thorough evaluation of Travel Cue’s pre-existing IT infrastructure was carried out to determine possible issues, prior to the network design phase. Once the design of the network infrastructure met Travel Cue’s specifications, Lantone’s engineers managed and executed the deployment, implementing vital features such as hardware, virtual hosting, and data protection.

The Outcome

After the initial deployment, Lantone’s engineers continue to offer IT support for Travel Cue’s network infrastructure. This included monitoring of the network’s health, implementation of network security features, data back-up plans, as well as disaster recovery plans.

Lantone Systems is also involved in ongoing upgrades to Travel Cue’s network infrastructure, so that the company will be increasingly better-equipped to serve its clientele.

About Lantone Systems Pte Ltd

Since 1998, Lantone Systems has established itself as a leading industry player in the provision of IT solutions for MNCs and SMEs alike. We are equipped to offer a broad range of solutions that are tailored to meet the Computing, Network, Telephony, and Infrastructure needs of your organization. We take pride in creating highly efficient and resilient IT environments for our clients, allowing their enterprises to stay competitive and perform to their fullest potential.
